

Online Collaboration Solutions

GroupSense provides complete end-to-end solutions that initiate and develop online collaboration for organisations and tertiary education providers. Because online collaboration involves culture change, the factors that make the most difference are the organisational planning and change management services. To underpin these, GroupSense also provides simple but powerful technology.

GroupSense Online Collaboration Solutions include:

- a custom designed Collaboration Site where people can collaborate in groups
- a complete set of Support Services that initiate and develop participation to deliver benefits

Online Collaboration Solutions follow a structured [Project Process](#).

Collaboration Sites

GroupSense Collaboration Sites enable groups of people to collaborate easily using ordinary email and the Web ([more](#)).

Support Services

GroupSense Support Services provide support and encouragement that initiate and foster participation to achieve benefits for the organisation and participants ([more](#)).
